

Angle valve specifications:

- Body : 304 S.S. (Other material available upon request)
 - Poppet: 304 S.S. (Other material available upon request)
 - Port ODs: 19.05~50.8mm
 - Bellows: Welded AM-350(option)
 - Solenoid: Option
 - Seal: Viton O'ring
 - Pneumatic actuation: Air to open-spring to close standard for valves up to 50mm bore
Air to open-air to close standard for valves 63mm bore and above
 - Leak rate: 2×10^{-9} std.cc./second
 - Pressure range: 2×10^{-9} torr to 760 torr Viton seal bonnet
 - Maximum Δ pressure before opening: 1.2 Bar
 - Operating air pressure: 4~6.5 kg/cm²
 - Cycles until service: 16 to 50~500,000
 - Bake-out limitation: 150°C Viton seal bonnet (200°C intermittent)
-
